## REYHER obtains AEO F Certificate

5 With effect from the 8<sup>th</sup> of July in 2011 F. REYHER Nchfg. GmbH & Co. KG received the AEO (Authorized Economic Operator) Certificate from the main customs office of the City of Hamburg. The customs separates three different standards of AEO certificates:

- AEO C (Customs Simplification)
- AEO S (Security and Safety Certificate)
- AEO F (Customs Simplification and Security and Safety Certificate)

10

The certificate AEO F contains measures in the area of property protection, business relation, employee and information security as well as packaging and logistics. Aim of the AEO certification is the protection of the permanent international supply chain from the producer of a product until the consumer.

15

The AEO status is given according to uniform criteria of national customs administration in the 27 EU member states and will be recognised in all member states. A decisive advantage will be the reciprocal acceptance of the EU-AEO with similar concepts of other countries. With Norway, Switzerland, 20 Andorra and Japan an agreement is signed and with the USA and China the EU is to conduct negotiations. Canada and probably other countries negotiations will be commenced shortly.

25 The AEO F certificate is an accepted quality and security feature by the shipping businesses and logistics provider. Therefore REYHER and its clients profit from the cooperation with Authorized Economic Operators (AEO), because an AEO certified company is classified automatically as a more secure and low-risk partner. Thus REYHER clients are strictly liable to less inspections.
