

# FASTENERS AUTOMOTIVE

# Automotive: an important industrial sector

The automotive industry and its whole automotive sector holds a key position worldwide. In assembly, service and repair of vehicles high quality fasteners are indispensable. The sector demands specific technical and logistics expertise. In production halls and workshops,

engineered and customer-specific parts are utilized to a large extent. These have to be readily available for just-in-time delivery with tracing information. The requirements for quality and sourcing are extremely high in this industrial field.

## REYHER: Automotive Competence Centre

With over 130 years' experience REYHER is one of Europe's distributor of fasteners and fixing technology supplying customers worldwide. REYHER steers activities from its central, main location in Hamburg. In Asia our subsidiary F. REYHER Asia-Pacific Co. Ltd., located in Shanghai and Taiwan, caters for procurement procedures and supplies customers based there.

Quality assurance is of highest priority. As a long-standing certified VDA 6.2 partner in the automotive sector, we have pooled our expertise to meet the specific needs of the sector in our own dedicated Automotive Competence Centre. We know the requirements of serial

production as well as the aftermarket and even in alternative drive forms as in e-mobility. We structure procurement procedures efficiently and reliably for our customers. One-stop shopping for products and services is optimal for our customers. This includes technical consulting, C-part management, procurement of engineered and customer-specific parts, as well as e-business solutions, compiling kits, Kanban supply systems and flexible logistics solutions. For all these services you will find your long term dedicated contact person at REYHER.

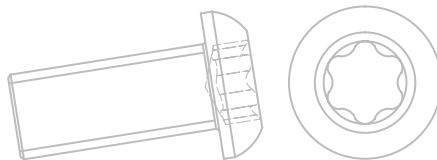

**Reliable deliveries from REYHER!**

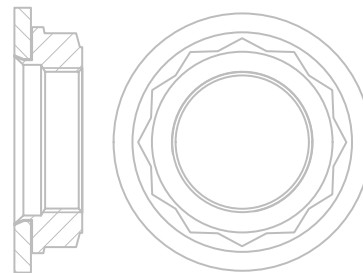

## ■ Reliable Quality

At REYHER the integrated management system covers all specific needs for quality, ecology and occupational safety. In addition to VDA 6.2 certification we have adapted our system to the needs of IATF 16949. REYHER is well-known in the market for its high quality standards. Our customers appreciate our reliable quality, with incoming products subject to comprehensive, careful in-house checks with modern equipment and methods. First sample documentations in accordance with VDA or PPAP are standard for us.

## ■ Technical Competence

REM – REYHER Engineering Management deals with all technical matters and details involving fasteners and fixing technology. The team is made up of experienced engineers and technologists with comprehensive specialist expertise, which is continually kept up to date through trainings. The REM Team looks forward to consulting you on all technical questions.

## Flexible Kanban supply systems

ROM – REYHER Order Management provides our customers with the highest supply and process reliability. Combinable modules, RFID technology, barcode systems, flexible labeling and modern data transfer systems make up an all-round carefree package for seamless materials sourcing. Reliable, precise and flexible, made to meet your individual needs.

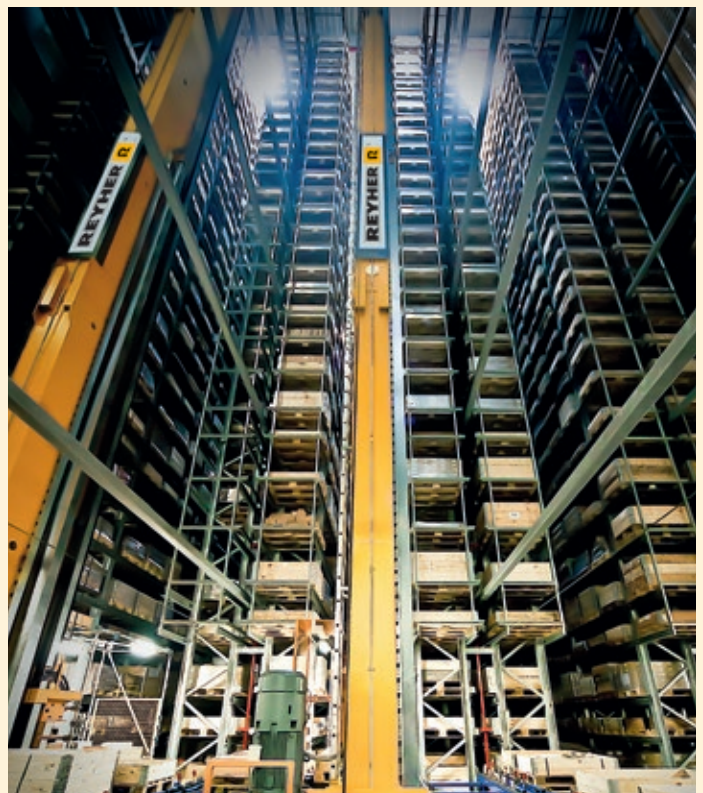

## Comprehensive e-business solutions

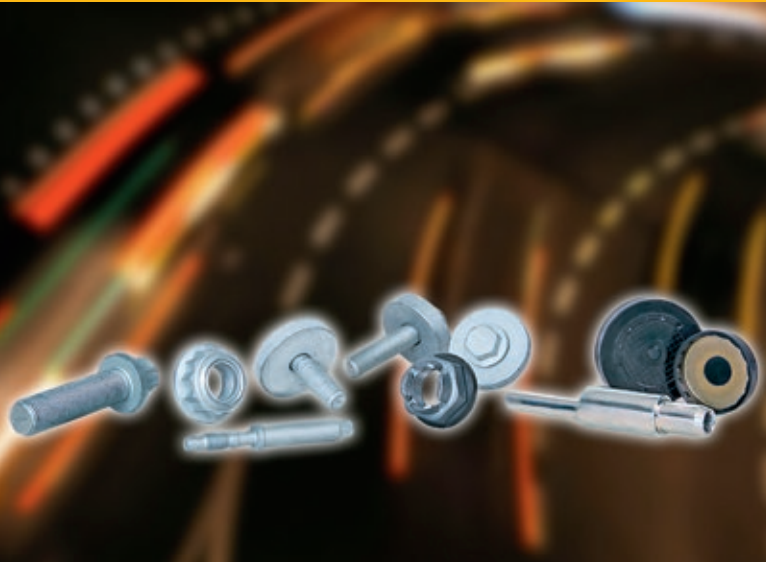

REYHER e-business solutions simplify procurement and speed up the ordering process. Automatic data processing also reduces manual checking, improves data quality and avoids errors. Many of our automotive customers use EDI, Electronic Data Interchange. All regular order sheets, order confirmation, delivery notification and invoices can be transferred electronically. Orders and call-up orders are automatically made and carried out at the click of a button. Other alternatives include the electronic catalogue, needs analysis by barcode, or ordering from our RIO – REYHER Internet Order webshop. We offer a comprehensive service, created in cooperation with you to determine your optimum ordering process.

## Central logistics centre in Hamburg

In our ultra-modern logistics centre with 100,000 pallet and 120,000 bin places, our incoming and outgoing goods are partly managed by shuttle systems. We have a daily fill-rate of over 99 percent. In our central warehouse we offer storage for fasteners especially for automotive customers, including delivery schedule processings and call-up orders. Fully-automated storage logistics and a reliable delivery system together with just-in-time deliveries with batch tracing are our daily business.

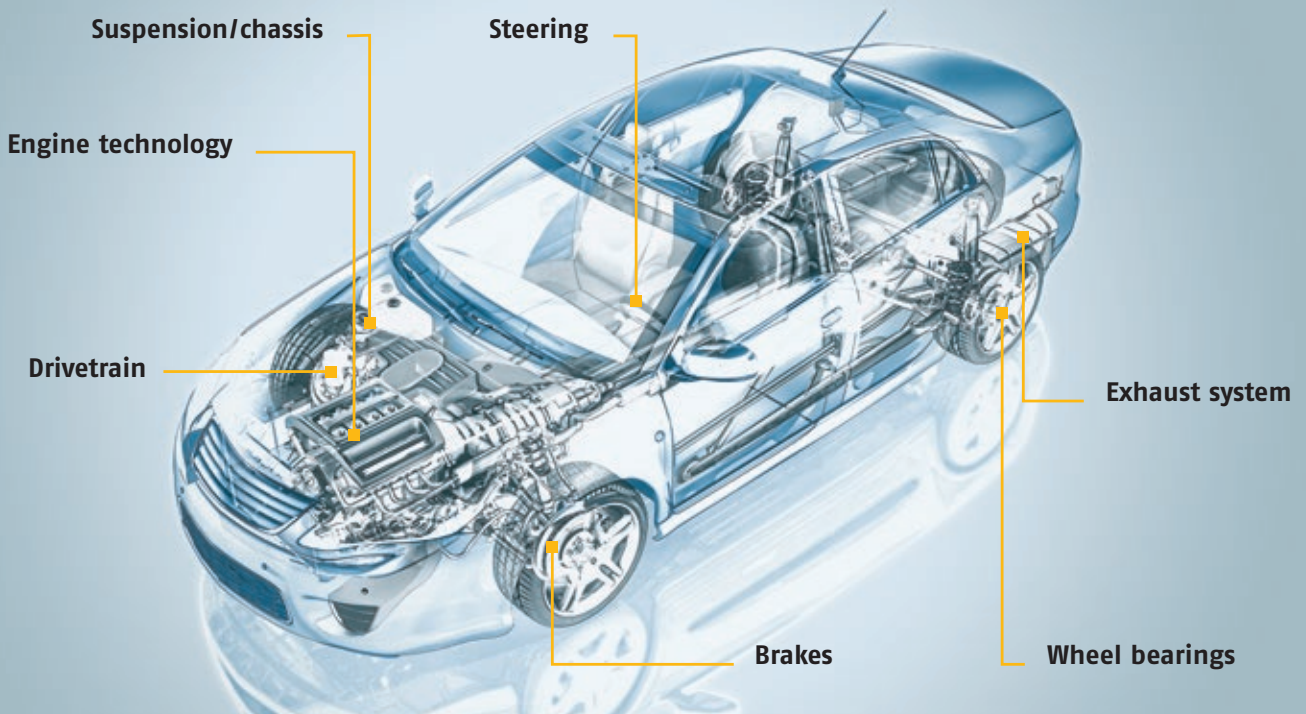

## ■ Comprehensive automotive product portfolio

Our supply programme comprises 130,000 standard, engineered and customer-specific parts. The product portfolio for automotive consists of 80,000 standard parts as well as several thousand original and engineered parts. In addition to fixings for steering and axle systems, chassis and wheel bearings also in the engine technology sector there are various further fasteners from the spare-parts programme for all common car and truck makes available. We choose additional suppliers according to strict quality criteria; leading partners from the OEM and supplier industry.
