# CONVERSION IN STANDARDS DIN → EN AND ISO

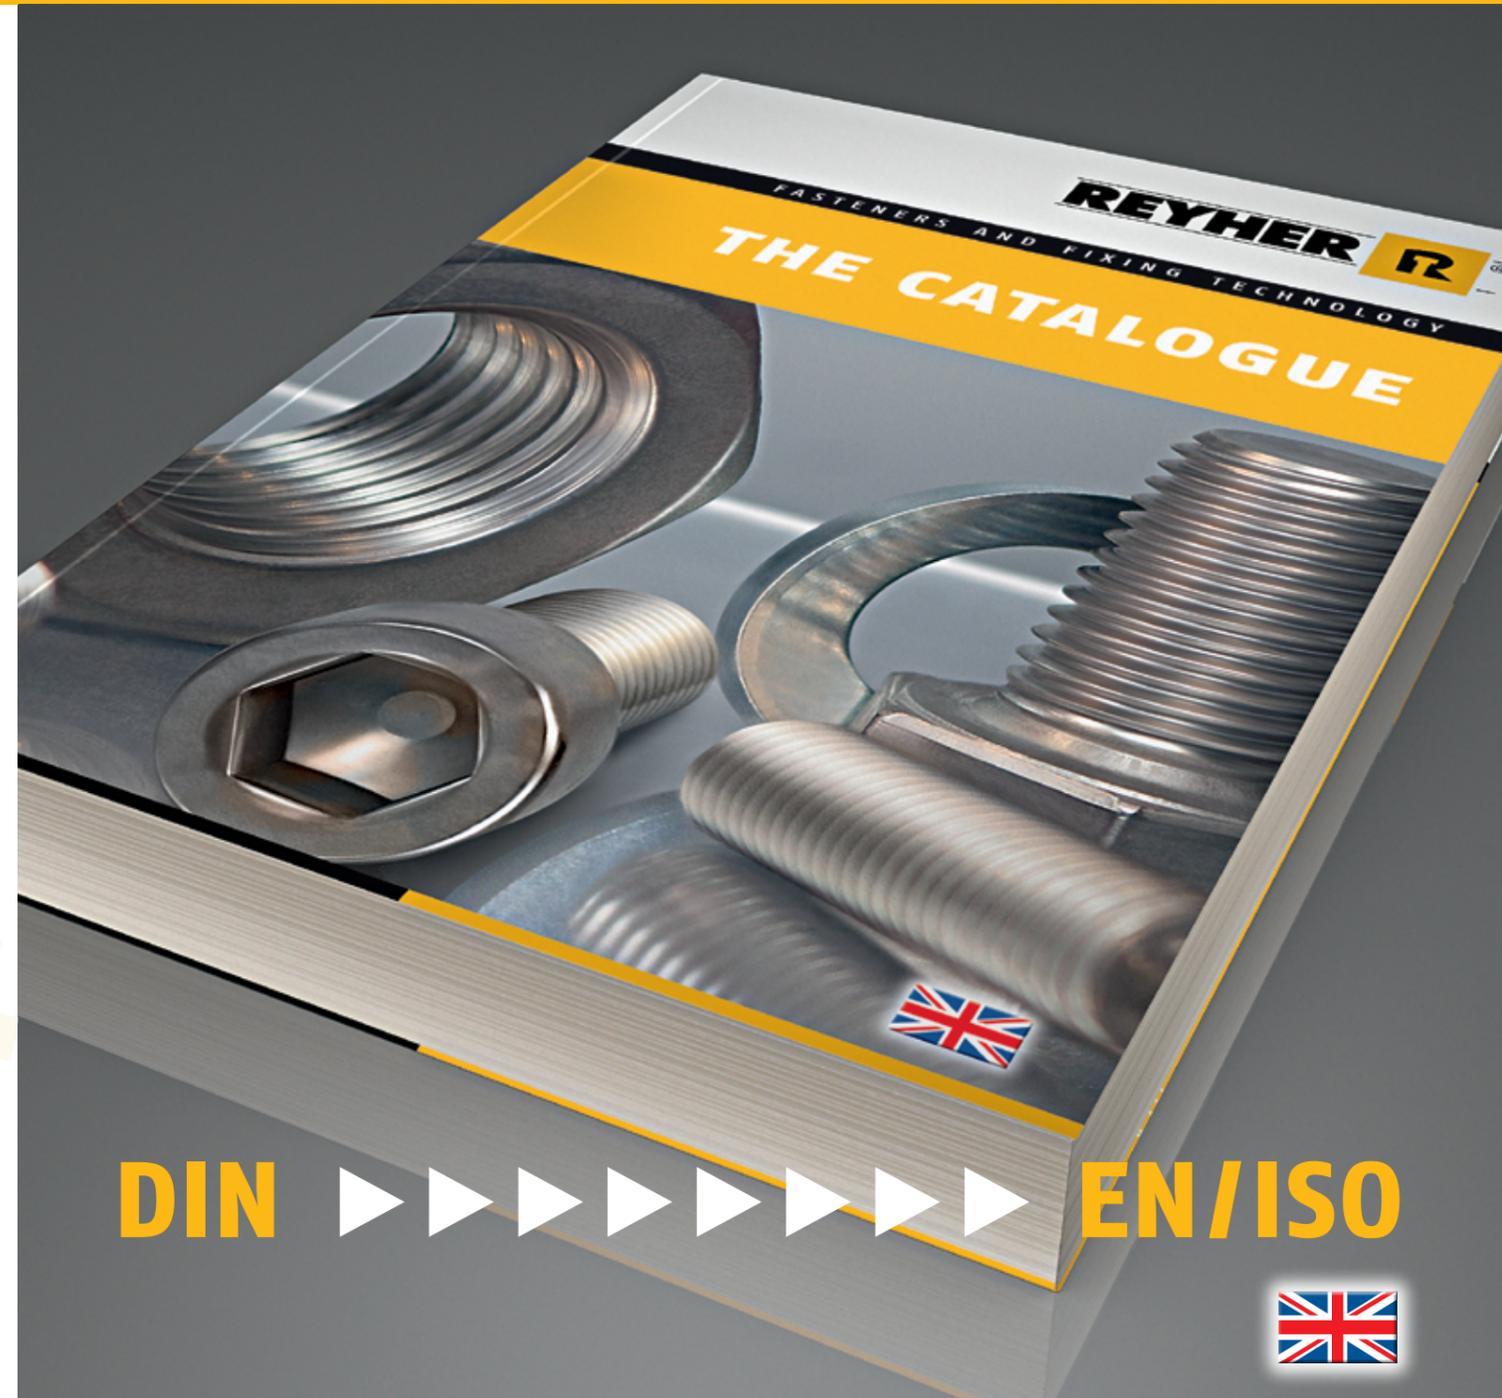

Fasteners in catalogue

DIN

EN/ISO

F4/EN12/0415

DIN

EN/ISO

## ■ Standards types and relations

### DIN

National German standard (Deutsches Institut für Normung). DIN standards shall still be given for the products/services, for which there are no EN/ISO standards and no standardisation necessity.

### ISO

International Standard (International Organization for Standardization).

### DIN ISO

National German issue of an unmodified, adopted ISO standard.

### EN

European Norm (CEN = Comité Européen de Normalisation) In general, existing ISO standards should be adopted as EN standards with the ISO standard number -> EN ISO. If this does not happen at European standards level, independent EN standards shall be generated with EN standard numbers which are different to those of the ISO.

### DIN EN

National German issue of an unmodified, adopted EN standard. According to the resolution of the European Council, EN standards are to be adopted unmodified immediately by the EU member states and the corresponding national standards are to be withdrawn.

### EN ISO

European standard issue which was adopted unmodified by ISO (EN and ISO standard numbers are identical – the earlier practice of “ISO number + 20,000” has not been in use since January 95. Standards still in use according to this mode are to be converted accordingly). The description is carried out according to ISO.

### DIN EN ISO

National German issue of an unchanged EN standard adopted by ISO. The article naming is done according to ISO.

## ■ Conversion from DIN to EN/ISO standards – an investment in the future

Changing some of the national DIN standards to EN or ISO standards will remove trading obstacles in international goods flows as well as harmonizing technical rules.

The directives in the international ISO standards, as well as the European EN standards, also standardize fasteners. Due to worldwide or European-wide defined dimensions and types, for example screws and nuts will be interchangeable. For many business divisions in companies this provides a new opportunity to optimise processes.

Especially companies working worldwide or exporting, benefit from the change to ISO standards for their fasteners. The same wrench sizes and heights play an important role in production and procurement. ISO standards will make many things easier. In procurement the many national standards need not be taken into account. In production the ISO standards can be used worldwide to provide the same fasteners and tools for manufacturing.

## ■ DIN and EN/ISO standards in the REYHER catalogue

To be ready today, for the needs of tomorrow the REYHER catalogue is ISO oriented. With a range of 80,000 items available for delivery the catalogue is structured in product groups with an extra coloured register, to make finding the right items easier.

The switch from DIN to EN and ISO standards brings some changes with it. On the following pages we give you a comprehensive overview of the items affected in the REYHER catalogue. At a glance you can find the changes for DIN/EN/ISO screws, nuts, washers as well as bolts, split pins and pins.

## ■ Technical competence

Our experienced engineers and technicians in the REM – REYHER Engineering Management team handle all technical matters and details concerning fasteners and fixing technology. Our technical expertise is always cutting-edge. This benefits our customers, who we are happy to consult with at any time and instruct in our training sessions.

				A 2, A 4		x	x	
	966	7047	Raised countersunk head screws with cross recess	4.8	ZP	x	x	▶
				A 2, A 4		x	x	

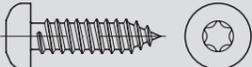

■ Head heights (h) and head diameters (∅) have changed from the dimension M 3 as follows:

Dimensions	max head heights h		max head diameters ∅	
	DIN	ISO	DIN	ISO
M 3	1.65	1.65	5.6	5.5
M 3.5	1.93	2.35	6.5	7.3
M 4	2.2	2.7	7.5	8.4
M 5	2.5	2.7	9.2	9.3
M 6	3	3.3	11	11.3
M 8	4	4.65	14.5	15.8
M 10	5	5	18	18.3

	7976	1479	Hexagon head tapping screws	St	ZP	x	x	▶
---	------	------	-----------------------------	----	----	---	---	---

■ Dimension ST 3.9 is omitted in the ISO standard  
 ■ Head heights (h) have changed minimally (no need to change product):

Dimensions	max head heights h	
	DIN	ISO
ST 2.2	1.42	1.6
ST 2.9	1.62	2.3
ST 3.5	2.42	2.6
ST 3.9	2.42	–
ST 4.2	2.92	3
ST 4.8	3.12	3.8
ST 5.5	4.15	4.1
ST 6.3	4.95	4.7
ST 8	5.95	6
ST 9.5	–	7.5

	7981	7049	Pan head tapping screws with cross recess	St	ZP	x	x	▶
				A 2, A 4		x	x	
	~ 7981	14585	Pan head tapping screws with hexalobular socket (~ TORX)	St	ZP	x	x	▶
				A 2		x	x	

no significant changes

	7982	7050	Countersunk head tapping screws with cross	St	ZP	x	x	▶
				A 2, A 4		x	x	
	~ 7982	14586	Countersunk head tapping screws with hexalobular socket (~ TORX)	St	ZP	x	x	▶
				A 2		x	x	
	7983	7051	Raised countersunk head tapping screws with cross recess	St	ZP	x	x	▶
				A 2		x	x	

■ Changed countersunk: DIN 80° / ISO 90°  
 ■ Dimension ST 3.9 is omitted in the ISO standard  
 ■ Head heights (h) and head diameters (∅) have changed as follows:

Dimensions	max head heights h		max head diameters ∅	
	DIN	ISO	DIN	ISO
ST 2.2	1.3	1.1	4.3	3.8
ST 2.9	1.7	1.7	5.5	5.5
ST 3.5	2.1	2.35	6.8	7.3
ST 3.9	2.3	–	7.5	–
ST 4.2	2.5	2.6	8.1	8.4
ST 4.8	3	2.8	9.5	9.3
ST 5.5	3.4	3	10.8	10.3
ST 6.3	3.8	3.15	12.4	11.3

Information: Listed in DIN standard order.  
 The glossary for abbreviations of materials and coatings is on page 19.

Product illustrations	DIN	ISO	Designations	Material/ property classes	Coatings	Catalogue items		Standards conversion DIN → ISO
						DIN	ISO	

	7985	7045	Pan head screws with cross recess	4.8	ZP, ZP TLP, YZP	x	x	no significant changes
	~ 7985	14583	Cheese head screws with hexalobular socket (~ TORX)	4.8	ZP	x	x	
				A 2		x	x	

	7991	10642	Hexagon socket countersunk head screws	8.8	ZP, ZP TLP, YZP		x	no significant changes
				10.9	ZP		x	

■ Dimensions M 22 and M 24 are omitted in ISO standards  
*Information: These dimensions are available at REYHER as DIN standards.*  
 ■ In the other dimensions the head heights (k), head diameters (d<sub>h</sub>) and thread lengths (b) have changed as follows:

Dimensions	max head heights (k)		max head diameters (d <sub>h</sub> )		thread lengths (b)	
	DIN	ISO	DIN	ISO	DIN	ISO
M 3	1.7	1.86	6	6.72	12	18
M 4	2.3	2.48	8	8.96	14	20
M 5	2.8	3.1	10	10.2	16	22
